

Since 1915, the Roth name has been synonymous with providing superior design and construction services to residential and commercial clients. Three generations of the Roth family have been ensuring quality design and construction projects completed on time and within budget. The Roth completed product can be seen throughout the United States.

The Early Years 1915 - 1955

In 1915 John E. Roth started his first business designing and constructing concrete bridges in the Southeastern Michigan area. In 1925 John E. Roth and his brother William F. Roth Jr. organized the company Roth Bros., Inc. for the purpose of constructing homes. From 1925 through 1933 under the company names of Roth Bros., Inc., John E. Roth Construction Company and Roth Detroit Builders, John and his brother built homes in the Pontiac, Flint and Detroit areas. From 1933 to 1946, John E. Roth continued to build houses in addition to providing appraisal and inspection services for the U.S. Government. In 1946, John E. Roth and his sons, John Jr. and Robert formed the construction company; John E. Roth & Sons.

Perfecting The Design/Build Process 1955 - 1985

The third son of John E. Roth, Thomas, joined the company in 1955. In 1955, to meet the changing business needs the construction company; John E. Roth & Sons was incorporated and the design firm of Roth Engineers was formed. These companies were established to offer both

our design and construction services to the local commercial, industrial and institutional clientele. John E. Roth & Sons, Inc., the construction company, provided the estimating, project management and construction services. In addition, John E. Roth & Sons, Inc. self performed the site work, foundations, masonry and carpentry work. Roth Engineers, the architectural and engineering company, provided the architectural design and the civil, structural electrical and mechanical engineering services.

For thirty years the design/build team of John E. Roth & Sons, Inc. and Roth Engineers produced quality projects for satisfied clients. Their projects included manufacturing plants, warehouse and distribution facilities, office buildings, automobile dealerships, recreational facilities, retail centers and church facilities. These projects were located throughout the United States. (Michigan, Ohio, Indiana, Pennsylvania, Florida, Connecticut, Kansas, Tennessee, Virginia, and New York)

Full Service Design and Construction Companies 1985 – 2003

In 1985 the decision was made to expand the services we offer to our clients. We also decided to enlarge the geographic area we would service from our home office. To do this we had to restructure our companies. During this period Robert M. Roth Jr. and Jeffrey W. Roth began to take a more active role in managing the business operations. The design services were expanded to offer the traditional architectural and engineering design service to our clients as well as the design services relating to our design/build projects. The firm, Roth & Associates, P.C. was formed to better provide these added design services and to assume the design role performed by Roth Engineers. Construction Management services was added to the General Contracting and Design/Build services already being provided to our clients. The firm Roth, Incorporated was formed to provide these expanded construction services. In 1989 the general contracting firm of John E. Roth & Sons. Inc. was merged into the

full service construction company Roth, Incorporated.

Roth & Associates P.C. established relationships with such high profile clients as United Parcel Service, SYSCO Corp., Penske Corp. and Federal Express Corp. Roth, Incorporated constructed many high profile religious structures in the Southeast Michigan area receiving awards from industry associations and organizations including the Engineering Society of Detroit, American Institute of Architects and Masonry Institute of Michigan.

The New Millennium

Today's ever changing market and industry conditions require that we approach our clients with a broad menu of design and construction service options. We listen to our clients needs and then recommend the particular services that will accomplish their project goals.

Clients may need only feasibility studies, pre-design services, design services, owners representation, project management or construction services. Whatever the requirement may be, Roth has the design and construction expertise and experience to ensure that the construction project will be completed on time and within budget.
